# i-fax.com

Imagine… Documents so smart they file themselves™.

Overview

i-fax.com's Universal Document Tag™ server plug-in allows documents to be tagged with our smart bar code. Each time a document is displayed or printed the Barcode Plug-In produces a unique barcode tag that links the document to a specific record in a database. It allows you to create documents that file themselves.

Using standard office equipment, such as Fax Machines, Desktop Scanners and All-In-One Printers, users can send tagged pre-indexed documents that are automatically scanned and linked to data in your enterprise database or website. End Users do not require specialized software or browser plug-ins.

You can **save over 80% of your document costs** by eliminating the labor required to index and file documents. Calculate your ROI.

1. **CREATE** barcoded documents that are **easy to manage** in PDF, HTML, Word and other popular formats.

2. **COLLECT** documents from end users using ordinary office equipment (Fax, Desktop Scanners, Multi-Function Printers and Enterprise Scanners).

3. **FILE** document images automatically and link them to data in your database or website.

DATABASE

4. **IMPROVE** workflow and document management by creating & collecting pre-indexed document images.

Note: The Universal Document Tag™ lets you route documents, make decisions, manage access to information and search for files.

Applications that require **any type** of paper document can be automated and web enabled using *i-fax.com*. See how. [Case Studies](#).

You can benefit from *i-fax.com's* Universal Document Tag™ if your organization has any of the following:

- Web Applications that need supporting Documents or Customer Signatures.

- Large volumes of documents and forms received by Fax, Email or Postal Mail.

- Document Imaging System requiring documents to be manually scanned and indexed.

- Secure document processing, such as HIPAA compliance.

You can eliminate manual document processing and experience the cost benefits of web based technology with *i-fax.com's* Universal Document Tag™.
